

Royal Commission for the Exhibition of 1851

Industrial Design Studentship

2023 Terms and Conditions

Background

The aim of the scheme is to stimulate industrial design capability among the country's most able graduates. Successful innovations need to be not only fit for purpose, they must also be technically feasible and desirable to their customers and the wider society in which we live. In the Commissioners' view, good design demands an interdisciplinary approach and cannot be dissociated from a clear understanding of the underlying technological, commercial, and social attributes of the product or service. It is for this reason that a good first degree in science or engineering is preferred, although students with other degrees will be considered. Equally, applicants with a first degree in design who wish to pursue a Masters in engineering may also apply.

Eligibility

- Resident in the UK.
- Intending to make a career in British Industry.
- Good first degree, normally in engineering/science but other degrees may be considered.
- Candidates will be expected to demonstrate precise analytical thinking, creativity and open-mindedness that will result in benefit to British industry.
- Must have obtained admission to a suitable postgraduate course, normally in the UK, in industrial design or in engineering if wishing to complement a design-oriented first degree.
- Normally recently graduated.

Award

- All tuition fees, up to the normal UK course level for UK students.
- Stipend of £12,000 pa (plus £4,000 London Weighting where applicable).
- Allowance of £850 pa for materials.
- Travel allowance to support the cost of an international study trip where this is part of the studied course up to £500 pa.
- Duration is one year. A second year will be supported if the course demands it and the first year has been satisfactorily completed.

Applications

Application is through website online submission <https://1851awards.flexigrant.com>

This must include:

- Full CV, which gives details of past work experience
- Statement and evidence of interest and expectations in industrial design, including the intention to make a career in British Industry. Candidates whose first degree has an inbuilt design element must clearly justify the value to be gained if a further course in design is proposed.
- Evidence of acceptance for the intended course. Applications from those who have already started their course should also include a reference from the Course Director
- **Completed applications must be submitted by 27 April 2023 at 12pm BST.**

Interviews of shortlisted candidates will be held in June 2023. Fellowships must commence in the year of award, normally at the beginning of October.

Data Protection

The 1851 Royal Commission is a data controller under the General Data Protection Regulation. The Commission is registered with the UK Information Commissioner's Office with registration number Z8305954. The Commission may collect and process personal data about you as part of your application. Full details of the types of data collected, the ways in which the data are processed and the legal basis for the processing are included in the [Privacy Notice](#).
